- Team company.
- Exchanges listing.
- Risk Disclaimer.
- Specific Sector Risks.

Introduction

- ▶ This project includes a very large facility for users of digital currencies as it works to provide Visa cards to benefit the holder during his daily life. We will mention its advantages later. In addition, our users can take advantage of ICO offers before entering the market.
- ▶ The good thing about this project is that it has a very small amount, 3 million. But less than 1.7 million is the amount offered for sale, which is the amount of supply in circulation.
- ▶ Given the severity of the project, we decided to cancel all bonus sales and the bonus system, as this represented a risk to the project. You know that this project is not easy to achieve, so we need strict adherence to a successful project.

RYM Project
